EDUCATION

Ph.D.	School of Mathematics and Statistics, Universitat Politècnica de Catalunya, Barcelona, 2023
M.E.	Mechanical Engineering, Indian Institute of Science, Bengaluru, 2016
B.Tech.	Mechanical Engineering, Visvesvaraya National Institute of Technology, Nagpur, 2014

RESEARCH AREAS

Bioengineering:	Cell mechanobiology, Tissue engineering, and Lab-on-the-chip
Mechanics:	Continuum mechanics, Material testing, and Soft matter physics

RESEARCH EXPERIENCE

PhD student, Institute for Bioengineering of Catalonia, and UPC

Adviser: **Prof. Xavier Trepat** and **Prof. Marino Arroyo** Aug 2017–Present

Thesis: **Mechanics of epithelial layers subjected to controlled pressure and tension**

Designed a microfluidic chip to control epithelial shapes and pressure.

Performed rheological study with epithelial monolayers to understand actin cortex remodelling.

Discovered a new method to generate epithelial folds via mechanical phenomena of buckling.

Computational tool for analysing nuclear to cytoplasmic transport

Working in collaboration with Prof. Pere Roca-Cusachs and Ion Andreu, developed a MATLAB script to calculate import and export rate of mechanosensitive protein.

Developed a fitting algorithm to elucidate protein mobility with Fluorescence recovery after photobleaching (FRAP), and utilized an elegant system of differential equations to analyze data from Fluorescence Loss in Photobleaching (FLIP).

Analysis of force loading rates associated with cell mechanosensing

Working in collaboration with Prof. Pere Roca-Cusachs and Victor Gonzalez-Tarrago, developed a MATLAB script for analyzing atomic force microscopy data from JPK software raw data.

Analyzed time-series data from AFM experiments to determine detachment force.

Analyzed optical tweezer data by fitting curves piece-wise linearly to calculate stiffness of the cells.

Masters, Mechanical Engineering, Indian Institute of Science

Adviser: **Prof. Namrata Gundiah** August 2014–June 2016

Design and fabrication of miniature shear device for cell mechanics

Designed a cost effective system capable of applying uniform shear on culture cells along with real time visualization using fluorescence microscopy.

Implemented trajectory generation filter based control system in the shear device electronics using MATLAB and Arduino programming.

Calibrated the device using fluorescence microscopy and traction force microscopy to test for uniform shear flow conditions.

Finite element analysis of coffee white stem borer (CWSB) mandible

Created geometry of the mandible from tomography data using image processing and CAD modeling.

Stress and displacement distribution on mandible during wood boring were computed using commercial FEA package, ABAQUS.

Stresses on the mandible were used to examine the morphological adaptations that provide distinct mechanical advantages to the insect for cutting purposes.

Conference Presentations

2022 **Chahare, N. R.**, Ouzeri, A., Golde, T., Wilson, T. Arroyo, M., and Trepat, X. "Shaping epithelia through buckling in pressure-controlled tissue." World congress of biomechanics, Taipei, Taiwan. July 10-14, 2022

2022 **Chahare, N. R.**, Ouzeri, A., Golde, T., Wilson, T. Arroyo, M., and Trepat, X. "Synthetic epithelial morphogenesis through controlled stretching and buckling." EMBL-IBEC Conference, Engineering multicellular systems, Barcelona, Spain. June 08-10, 2022

2022 **Chahare, N. R.**, Ouzeri, A., Golde, T., Wilson, T. Arroyo, M., and Trepat, X. "Synthetic epithelial morphogenesis through controlled stretching and buckling." EMBO-EMBL Symposium, Mechanobiology in development and disease, Heidelberg, Germany. May 15–18, 2022

ACADEMIC ACHIEVEMENTS

Awards and Honors

2022 Won the best poster prize at 15th IBEC SYMPOSIUM on Bioengineering for Active Ageing, Barcelona, Spain.

2014 All India Rank 362 (99.8 percentile) out of 185, 578 in Graduate Aptitude Test in Engineering in Mechanical engineering.

2016 Second prize for Best paper presentation in Association for Machines and Mechanisms Industrial Problems on Machines and Mechanisms (IPRoMM), Nagpur, India.

2013 22nd position in national level presentation competition for future transportation solution, TATA MOTORS' MIND ROVER.

Grants

2019 International travel grant for attending winter school on Quantitative Systems Biology at International Centre for Theoretical Sciences (ICTS), Bengaluru, India.

2014 Awarded scholarship by Indian Ministry of Human resource and development for Masters in Engineering at Indian Institute of Science, Bengaluru 2014-16.

IN PRESS

2023 Invited to be on panel discussion on subject of "Why scientists should care about art?" Roundtable discussion was in Catalan (link)

2022 Interviewed for European Commision funded project, Mechanocontrol,
Talked about the inventing novel microfluidic devices. (link)

TEACHING EXPERIENCE

Institute for Bioengineering of Catalonia

2021 Mentored Gavin McQuarrie, student from University of Glasgow, jointly with Anabel-lise Le Roux to calibrate and develop stretch system.

2021 Alexandre Garcia-Duran's UB Summer Intership project
Characterization of stiffness of PDMS and development of Microfluidic device for stretching cells/tissues

2017 Treball de Recerca
Mentored two high school students in a project related to 3D epithelia

TECHNICAL SKILLS

Cell Biology and Microscopy

Spinning disk confocal microscopy, Airy Scan Confocal microscopy, light and fluorescence microscopy.

Photobleaching techniques in Fluorescence recovery after Photobleaching (FRAP) and Fluorescence Loss in Photobleaching (FLIP).

Cell culture, Protein Micropatterning techniques, and Elastomer preparation, Hydrogel preparation.

Programming

MATLAB, C, C++, Python, FIJI macro, Maple, Wolfram Mathematica, HTML, LaTeX and Arduino IDE.

Design and Analysis

SolidWorks, Inkscape, Adobe Illustrator, SolidEdge, Cinema4D and Keyshot.

ImageJ, AMIRA, ABAQUS, Hypermesh, and COMSOL.

ACTIVITIES

Responsibilities

Managed data servers (synology and magnetic tape drive system) in the Prof. Trepat's lab.

Member of PhD committee at IBEC.

Outreach

Active member of Science day events, planning committee for communicating popular science 2018–.

Volunteered at Structural Integrity Conference and Exhibition (SICE) 2016.

Cultural committee member, organizing cultural programmes in Marathi mandal IISc 2015.

Active member of Social Welfare Society at VNIT 2014.

LANGUAGES

Native: Marathi, Hindi

Fluent: English

Beginner's proficiency: Catalan

Updated March 2023
